OLD-FASHIONED JAM

WITHOUT OLD-FASHIONED FUSS.

Gone are the times when you had to set aside whole days in order to make your own scrumptious jams, jellies and preserves.

Gone too are the hours spent with messy paraffins.

In fact, with Certo® Fruit Pectin you don’t even have to cook.

Take Strawberry Jam. All you need to make it are fresh ripe strawberries, sugar, lemon juice, and Certo. (A half bottle will help you make about 5 1/2 cups of jam. Just follow the quick and easy recipe you’ll find with many others tucked behind every Certo label.)

And all you do is crush the strawberries, mix everything, and stir for three minutes.

Then put it all in tight-lidded containers, pint size or smaller, and let stand till it sets.

Pop it into the refrigerator and there you have it. As natural-tasting a homemade jam as ever graced a biscuit.

And what you don’t plan on serving within three weeks you can freeze.

When it’s thawed, it’ll still have the fresh fruit flavor it had the day you made it. Those luscious strawberries into a jam.

Now making home-made jam is as simple as mixing fruit, sugar and Certo.

Sweater

(Continued from Page 11)

Work 11 rows of stockinette st.

Repeat first and second snowflake design with 11 rows of stockinette st in between until 5 rows of snowflake designs have been completed. After 5th row of snowflake design, work in stockinette until piece measures 14 inches from beginning or desired length to underarm.

Armhole Shaping: Bind off 5 sts at beginning of next 2 rows. Dec 1 st at each end of needle. Begin yoke pattern according to chart on next k row. (Note: Sulky wheel is embroidered.) At same time, dec 1 st each end of needle of each k row 4 more times—76 sts.

Shoulder Shaping: When armhole measures 8 inches from first bound-off st on armhole shaping, bind off 8 sts at beginning of next 6 rows. Place remaining 28 sts on st holder for back of neck.

Front: Work same as for back until armhole measures 6½ inches (measure in straight line from first bound-off st).

Neck Shaping: Work 26 sts, place center 24 sts on st holder, work second 26 sts. Continuing to work on right front, dec 1 st at neck edge 2 times, shaping shoulders as for back when armhole measures 8 inches. Work left side to correspond.

Sleeves: With size 4 needles and MC, cast on 44 sts. Work in k 2, p 2 ribbing for 3 inches. Change to number 6 needles and work in stockinette st for 6 rows.

Row 7: K 4 MC, * k 3 CC, k 3 MC, repeat from * across, ending k 4 CC.

Row 8: P 4 MC, * p 3 CC, p 3 MC, repeat from * across, ending p 4 CC.

Work 10 rows stockinette. Repeat snowflake rows same as snowflake design on back. At same time as snowflake design is worked, inc 2 sts at beginning and end of row every inch 12 times—68 sts. When underarm seam measures 18 inches, shape top of sleeve.

Cap Shaping for Sleeve: Keep continuity of snowflake pattern, bind off 5 lsts at beginning of next two rows—58 sts. Dec 2 sts at beginning of next 6 rows—46 sts. Dec 1 st at beginning of every row 24 times—22 sts. Bind off remaining sts.

Finishing: Sew sweater together at shoulder seams and work neckband as follows. With size 4 needles, k 28 sts from holder for back of neck, pick up and k 12 sts along left neck edge, k 24 sts of front neck, k 12 sts along right neck edge—76 sts. Work in k 2, p 2 ribbing for approximately 1 inch. Bind off loosely in ribbing. Sew underarm, sleeve and side seams. Sew in sleeves. Block and steam lightly.

Beach Bag

Interior is designed to accommodate wet swim suits. Model was made in 70-yard skeins American Thread Company's "Aunt Lydia's" Heavy Rug Yarn—about 3 skeins white, 2 in a contrasting color. Use crochet hook H or any size needed for gauge and a king size (5½ quart) bleach container.

Abbreviations:

The beauty of hairpin lace is displayed in two shades of blue. Stole takes about 8 ounces of each shade in Mary Maxim Super 4-Ply Knitting Worsted, Susan Bates crochet hook G-5 and Susan Bates 1-inch hairpin loom.

**Abbreviations:**
- lp (loop)
- ch (chain)
- sl st (slip stitch)
- rnd (round)
- sf (stitch)
- sc (single crochet)

**Basic Instructions For Making Hairpin Lace.**

**Step 1:** Remove cross bar from bottom of loom. Loom is held with round end up (or remaining bar up if adjustable loom). With crochet hook make a very loose ch st.

**Step 2:** Remove hook and slip this st on to left prong of loom. Replace cross bar. Pass yarn around right side of loom and across back. Insert hook into ch st and pull knot to right until knot is in center of loom. With hook, pick up yarn and pull it through lp.

**Step 3:** Ch 1.

**Step 4:** Turn loom from right to left toward you, remove hook and put it back in st on other side or pass shank of hook through loom. Pass yarn around right prong. With hook in remaining st, pass hook under front of lp on left-hand prong. Pick up yarn and bring through lp—2 lps on hook.

**Step 5:** Pick up yarn and pull through both lps.

Repeat steps 4 and 5 until you have desired number of lps.

**STOLE:** With light blue, make a length of hairpin lace, with 24 lps (each side). Tie ends together.

**Center:** With deep blue (keeping the twist), * draw yarn through 3 lps, ch 1, repeat from * 7 times, fasten off.

**Outer Edge:** With deep blue (NOT keeping the twist), join with a sl st through 3 lps, ch 9, * join through the next 3 lps, ch 9, repeat from * around, fasten off.

**To Join Medallions:** On last rnd, after joining with sl st through 6 sets of lps, ch 4, join over ch, ch 4, join through next 3 lps, ch 4, and join over ch, ch 4, join through last 3 lps, fasten off.

**Fill-In Medallion:** With deep blue, * ch 4, (leaving the first st loose) sc over ch of medallion, ch 3, sc in first st, repeat from * 7 times, fasten off.

**Fringe:** Cut 4 strands of each color, 10 inches long. From the back, pull a lp of all strands over chain of medallion, pull all strands through the lp and pull down even, (the notched places will need 11-inch strands). Trim fringe even.

**Stole In Hairpin Lace**
Home canning of vegetables and fruit gives good, nutritious foods. It is fun to can and very rewarding. Certainly it is an economical way of preserving fruits and vegetables when they are plentiful in garden.

Good canning equipment is necessary for best results. Never use a container or cap that isn’t meant for canning. It is important to take an inventory of jars, caps, lids. There are several kinds on the market that can be purchased. The jars come in half pint, pint, ½ pint, quart and half gallon sizes. Most of these sizes can be used for freezing too. The wide mouth jars are easy to clean and to empty. They are particularly good for whole fruits and vegetables. Lids and proper fittings are available for various types of jars.

Sterilize all utensils, jars and lids to be used, then place in boiling water. Besides jars you need a steam-pressure canner or a large kettle with lid for the water-bath method. Miscellaneous utensils needed are: jar lifter, funnel, measuring cups, a colander, wire basket, large dipper or ladle and spoon, food chopper or grinder.

It is important to read canning instructions and recipes before starting any canning project. Be sure to apply proper canning method and process for the time specified. Canned food will spoil if it is not processed long enough.

Select sound, firm-ripe fresh fruits and vegetables for successful canning. Spoilage can be caused by overripe and bruised foods. Choose young, tender vegetables. Tomatoes and fruit should be well ripened, but firm.

Wash all foods thoroughly before preparing them. Sort and discard all bruised or spoiled foods. Food will spoil because of the action of microorganisms known as molds, bacteria and yeast. These are found in air, soil and water. Their action is stopped by correct usage of heat. Jars of food must seal airtight after processing so microorganisms in air cannot enter jar. High boiling temperature prevents growth of molds and yeast. If not destroyed, they will grow in canned food, causing it to spoil. Spoilage is evident in canned foods when the food “works,” molds or an unpleasant odor. It may be sour, soft or in some way not good to eat.

Botulism is a poisoning caused by a toxin which is produced by growth of spores in a sealed jar. These spores can grow in a tightly sealed jar of any low-acid food. Home canners who use correct methods of selecting, preparing, packing and processing foods have no reason to be worried about botulism.

As an added precaution, all low-acid foods should be boiled 15 minutes before taring in order to destroy any toxin that may be present if an error was made in any processing step. Enzymes are natural substances found in all fruits and vegetables. They aid the process of canning.

Bonnie’s happy household hints:

Keep your hands out of the grinder.

Some popular cleansing powders operate on the theory that the best way to clean your sink and tube is by grinding. They’re loaded with grit that takes off the glaze and scratches the porcelain. And just think of your hands! In the grinder. And in locker-room type bleach at the same time. There has to be a better way.

Bon Ami Polishing Cleanser is made by people who believe that grinding’s for the butcher and scratching’s for the birds. They’ve eliminated harsh grit, and used a smoothing and polishing agent.

Bon Ami whisks away food stains fast. It bleaches, polishes, smooths and shines Formica, tile, porcelain, pots and pans. No grinding. It’s pure white, almost odorless. Won’t leave green stains.

The streak on the other side of the window.

You know the feeling. You clean the inside of the window. And the streak’s on the outside. Out you go, and presto! The streak appears on the inside. I call it the ping pong ball syndrome.

Well, stop bouncing. Bon Ami Window Cleaner is here. No streaks, no kidding. No strong ammonia odor, either. Try it for all the glass around your house.

**Cherry Jam**

1 1/4 cups prepared fruit (about 1 quart fully ripe sweet or sour cherries)  
4 cups (1 1/2 pounds) sugar  
1/4 cup lemon juice (2 lemons)  
1/2 bottle fruit pectin

Pit then grind cherries. Measure 1 1/4 cups of cherries into a large bowl or pan. Thoroughly mix sugar into fruit; set aside. Squeeze juice from lemons; add 1/4 cup to fruit pectin in a small bowl. Stir into fruit. Continue stirring about 3 minutes. (A few sugar crystals will remain.) Ladle quickly into jars and cover at once with tight lids. Let stand at room temperature until set (may take up to 24 hours); then store in freezer. If jam is used within 3 weeks, it may be stored in refrigerator.

**Spiced Peaches**

8 or 9 medium size peaches  
1 1/2 to 1 1/4 cups syrup  
1/2 teaspoon vanilla  
1 stick cinnamon  
1 inch piece of ginger root

Sufficient for one quart. Use fully ripe, but very firm freestones. Cline may be used if desired. Make syrup by pouring equal measures of sugar and water in saucepan, boil 3 or 4 minutes; keep hot until needed. Actual amount of syrup depends upon size of fruit and tightness of pack. Wash and drain peaches. Put peaches in wire basket or cheese cloth, lower into boiling water to loosen skins. Leave about 30 seconds, then quickly dip in cold water. To prevent darkening, have a container of two quarts cold water with 1 tablespoon each of salt and vinegar. Remove skin and drop into salt-vinegar water. Bring syrup to boil, add a few peaches at a time and boil gently 5 minutes. Place precooked peaches in jar, leaving 1/4 inch head space. Add cinnamon and vanilla. Fill jars to 1/4 inch of top with boiling hot syrup in which peaches were heated. Wipe off top and sides of jar. Put on lid and screw tight. Process 20 to 25 minutes in boiling-water bath.

**Strawberry Jam**

2 cups prepared fruit (about 1 quart fully ripe strawberries)  
4 cups (1 1/4 pounds) sugar  
1/2 cup water  
1 box (1 1/2 ounces) powdered fruit pectin

Use only containers 1 pint or less in size that have tight-fitting lids. Wash, scald and drain containers and lids. Stem and thoroughly crush strawberries, one layer at a time. Measure 2 cups into a large bowl or pan. Thoroughly mix sugar into fruit; let stand 10 minutes. Mix water and fruit pectin in a small saucepan. Bring to a boil and boil 1 minute, stirring constantly. Stir into fruit. Continue stirring about 3 minutes. (A few sugar crystals will remain.) Ladle quickly into containers. Cover at once with tight lids. Let stand at room temperature until set (may take up to 24 hours); then store in freezer. If jam is used within 2 or 3 weeks, it may be stored in refrigerator. Makes 5 1/2 cups or about 5 (8 ounce) containers.

Flower and Garden

I would like to know how to care for a heather plant. A.R., Mich.

Hardy heaths and heathers go on a mound bed, acid, gritty soil, very little fertilizer. Mulch the first year with loose hay or with large coarse fern.

What causes our white dogwood tree to bloom only on one side (the west side) and mostly on one limb? Mrs. R. E., Ky.

The tree has a knot or an old injury in the trunk that is infected. Either a normal movement of sap or else something has injured a substantial part of the root system.

I planted petunias in my flower boxes as usual and they did fine, then suddenly leaves got brown and started to dry up. Could I have watered them too much? E. P., Pa.

Yes; containers (urns, boxes, etc.) need plenty of drain holes, a bottom layer of broken pot or aggregate, and a porous, fast-draining soil mixture. Then you must add liquid plant food to the water frequently, as nutrients wash away quickly.

I have a snowball bush. Every spring unless I spray it early (before leaves start), worms get on leaves and leaves curl around worms so no spray can touch them. What kind of spray can I use to kill whatever is laying the eggs? R. W., Mich.

Look again; this is not a worm, but aphids. These overwinter in buds of plant, so are there when leaves unfurl. As leaves unfold, spray with an insecticide mixture containing a systemic insecticide, repeat every four weeks. Or plant a Japanese snowball which does not have this problem.

I received a pink hydrangea for Easter. Will it grow in the garden? What treatment is needed to keep it pink? Mrs. J. F., Ky.

Greenhouse hortensias are quite frost sensitive, but in a very sheltered Kentucky garden you might have luck getting the plant to rebloom. Give it an east exposure, plant in soil amended with lots of decayed barnyard manure. To brighten pink color, keep soil mildly acid with compost or mulch a Japanese snowball which does not have this problem.

I was given a passion flower plant. Please advise culture. L. S., N.Y.

If it is the common, usually purple-flowering kind, set in garden in deeply spaded, well fertilized soil and in full sun. Mulch in winter after it freezes down. It will come up again late next spring. Grow tender kinds indoors in a pot. Water and feed regularly; prune to keep in bounds.

Are two lilac bushes necessary for cross pollination? My bush has only two blooms. It is in semi-shade and fertilized. Mrs. H. R., Pa.

Most single lilacs are self-fertilized—but this has nothing to do with flower production. Move your bush to full sun, give it deep, rich soil and plenty of water through summer.

When would be the best time to separate cushion mums and plant them in another spot? Mrs. W. M., Fla.

Every kind of chrysanthemum plant should be lifted in spring when the shoots are two inches high; divide down to single stems and if rooted, plant in a bed or in border where they are to bloom. Otherwise, root them first in sand.

Is there anything I should do for a 5-year-old hydrangea that has never bloomed? Miss F. R., Kas.

Be kind and call it a silk-tree; mimosa is a yellow-flowering relative that grows only in the tropics. Fertilize with the flowering tree cartridge in a hose-attached root feeder when leaves first appear in spring.

Can lilacs of the valley be moved from one place to another? When should they be divided and how often does this have to be done? Miss E. L., Ohio.

Dig up clumps to move in early spring just as pips show above ground. Disturb the roots as little as possible and reset at the same depth. To thin a crowded old bed, dig out (bucket-sized) clumps every foot or so and fill holes with rich soil amply fortified with old barnyard manure or dehydrated manure and peat.

Kale, botanically known as Brassica oleracea acephala, is a variety of cabbage that does not produce a head. It is often referred to as rich vitamin greens. There are edible and ornamental kale and numerous varieties of each.

Edible kale wilts soon after harvesting but only a few leaves need be picked at a time.

Asparagus kale, grown only where winters are not severe, will produce succulent young shoots in early spring.

Dwarf green curled kale has large curled and fringed leaves bright green in color.

Tall green curled Scotch is very much like the dwarf except it has an upright spreading habit and stalk holds leaves well up off ground.

In southern areas kale can stand cold and will furnish table all winter with delicious pot-herbs. A variety grown mainly in the South and treated best as a biennial is called collards. This will grow ten to thirty inches high and on top of stem will be a loose cluster of cabbage-like leaves. Another closely related green found in many southern gardens is Georgia collards or Southern Creole boiling greens. It is tall, loose-leaved, cabbage-like and well adapted for soil too poor for cabbage.

Ornamental kale grown for garden decorations and use in floral arrangements is not recommended for eating. This is raised from seed sown in April or May. A package of mixed seeds will produce plants with leaves of various colors—purple, rose, white with colored markings and others reddish. These will make a colorful border around vegetable garden or help to fill in vacant places throughout flower garden. They are pretty and are fine conversation pieces.

Insects harmful to cabbage, radishes and turnips will also harm kale. Spray or dust with an insecticide recommended by local garden center or County Extension Service.

Window Box Featuring Lantanas

Lantana is an evergreen flowering plant from tropical America and a member of the Verbenaceae family. It is very appropriate for window box decoration. Leaves are ovate, rough and hairy and are produced on brittle weedy stems. Flowers range in tricolor from purple, cream, yellow, pink, red and white appearing at end of branch. Because of condition of stems, it is best to consider location of window box with regard to strong wind gusts.

Lantanas need a great deal of sun, plenty of water and average mixture soil. Superphosphate or bone meal helps them to bloom. Continuous blooming will be aided by picking off old flowers before they set seed balls. A temperature of 60°F. over will bring a lantana into full flower.

Proper pruning gives lantanas a long life and nice shape.

Providing you have space, lantanas may be carried over from year to year. Proper pruning will award you with year around bloom.

Before frost it is wise to prune back enough to produce a nicely shaped plant for indoor enjoyment. Pruning may be done again before setting outside for summer.

Fall cuttings make nice blooming plants following summer; spring cuttings will bloom early next year. One plant lives for years and if properly pruned will increase annually in size and beauty. To maintain this form and beauty, regular feedings of cow manure tea, fish emulsion or Miracle-Gro are recommended.

Soft stems root very rapidly in moist sand or vermiculite if covered with a tent made of polyethylene. Rootone is very helpful in getting cuttings to root. Dip cuttings in it before placing on propagating bench. Tent holds in moisture needed to prevent drying up and wilting. Once a good root system has formed, cuttings may be potted up; cover again with a polyethylene tent until well established.

White fly is its greatest pest. Control by careful routine inspection and spraying with a good insecticide like malathion.

Hanging pest-strip in greenhouse or home helps rid plant of insects.
Everlasting Candle
Willard and Elma Waltner

Draw a circle on bottom of carton about ¼ inch larger in diameter than bottom of candle cup. Divide circle into pie-shaped wedge segments measuring about ¼ inch each at circumference line of circle. Use a sharp knife to cut through cardboard along straight lines marking wedge shapes, from edge to edge of circle; press triangular flaps downward to inside of box—(photograph 2).

Use candle as centerpiece on buffet table, or as a decorative piece elsewhere. This huge candle will burn "forever" and never lose a bit of its size. The secret is an altar light candle in its glass cup, fitted into a milk carton that masquerades as a giant candle, and burns freely.

Fit candle cup into opening—(photograph 3); work it down until top of cup is no more than ¼ inch above carton.

Shave half a pound of paraffin wax (or candle making wax) into a clean number 2½ tin can. Set can in pan of water (never set wax container directly onto stove burner); heat until wax is melted.

Remove wax from hot water and allow it to cool until a film forms on top of melted wax. Beat soft wax with a rotary egg beater until it looks like stiffly beaten egg whites.

"Frost" entire milk carton, sides and bottom (now top). Build wax up around candle cup until edge is covered and is completely hidden. "Dabble" wax onto carton so it has a rough finish.

When frosting is cold and hard, set altar light candle into glass cup and giant candle is ready to use. Combine it with flowers, figurines, or other decor appropriate for occasion.

Spun Polyester Thread

Among the newer sewing threads on the market is this cellophane-sealed Lily Spun Polyester Thread. It is made of 100% Trevira polyester—an extraordinary fiber. The perfect thread for knits, permanent press, bonded and stretch fabrics. You'll find it sews like cotton and wears like iron. Other features to look for: requires no tension adjustments; has no wrap or covering to fray; does not deteriorate with heat; seams give and never gape; shrink-proof; machine washable or dry clean; color fast; non-allergenic.

You can sew with complete confidence and success with this thread. The magic is in the long-staple Trevira fiber—for strength and durability. Breakage of thread is a thing of the past when this thread is used.

Now go ahead—make your own magic with wonderful new fabrics... this is the thread that makes them all easy!

When sewing cuddly dolls and animals for bazaars or as a gift, be sure to make them all washable—outer fabric, terry cloth lining. These playmates get quite dirty and need frequent tubbing to be kept clean and sanitary for young owners.

Hook a Rug in Crewel Pattern

Joan Moshimer

Lovely traditional design is based on "Tree of Life" on which grows fanciful flowers, fruit and leaves in glorious profusion. Completed size about 26 x 39 inches. This design is for the "rugger" with some experience and also for the courageous beginner. Hooked in the old manner, using narrow strips of wool cloth, it is charted to show where each color is to go. The wools in kit are uncut, they can be cut by hand into straight strips ⅛ inch wide or slightly narrower, however use of a strip slitter is strongly recommended for such an ambitious project (Fig. 1). Roll cut strips in strong brown paper (Fig 2) and mark color number on them. For "ruggers" who can supply their own wools, you need: 6 shades of blue-green, 4 shades of gray-green, 3 shades of rose, 3 shades of dull gold plus accent colors (see color chart and use color photograph as a guide). You may use colors of your own choice if you wish.

General Basic Hooking Directions: Pattern should be in a frame to hold it taut. Hook is held in right hand above pattern and strip of wool in left hand beneath pattern. Push hook through burlap, sliding small shank of hook between thumb and forefinger of left hand, until it catches hold of strip, (which is also between thumb and this finger — Fig. 3). Pull up strip bringing end through to top side to a height of about 1 inch. All ends are brought to top side and later trimmed to same height as loops. Now put hook into next mesh and pull up a loop to about ⅛ inch. As you pull up, press smooth side of hook against burlap, to make hole bigger so that hook will pass through easily. Working in any direction, keep pulling up loops evenly, skipping a mesh occasionally to keep loops from being packed too tightly. They should touch each other comfortably. When end of strip is reached, bring it through to top side. On a small piece of burlap, practice on background until hooking is even and becomes easy to do (Fig. 4). Keep at least 6 feet from finished design.

Sew 2 rows of machine stitching ⅛ inch beyond outside of pattern as shown (Fig. 5). Then sew ¼ inch rug tape (not iron on) around edge, easing at corners, then baste it back. Hooking will go right up next to tape.

Begin by hooking design A (large flower in center), then do B, then C, then D. Next, hook all "shamrock flowers" E, then strawberries F. Next,

the small leaves G, then make large leaves H and I.

Trunks are hooked next, then stems. Next make the "hills." Background is hooked now (Fig. 4), but first hook one line of background around hooked motifs—this helps to preserve their shape. To keep light background color clean, cover with a handkerchief as you work.

Next hook border motifs J, then fill in border background. Arrows on charts indicate direction lines of hooking.

Now study the rug—are leaves and petals gracefully pointed? It is easy for them to become blunt, especially when putting background around them. If they are, tuck in a few extra loops to make points. Check rug back to see if there are any holes. If so, fill them in.

To finish off, steam press thoroughly on wrong side, using a damp cloth, then again lightly on top side. Cut off excess burlap about ¼ inch beyond two rows of stitching: When turned back, rug tape should cover excess burlap.

Note: Tape can be turned all the way so that it doesn’t show, then hand hemmed, or it can be turned back partway, so ¼ inch shows from top side, as in model. Tape must be in a matching or harmonizing color. This latter method makes an attractive edge. Hand stitch to back of rug.

Editor’s Note: Complete Rug Kit (stamped pattern on burlap, uncut wool for design & background, hook & instructions) $33.95 p. Stamped pattern & instructions, $5.95 p. Uncut wool for design, $16.95 p. Uncut wool for background $12.00 p. For details of other background colors, send stamped, self-addressed envelope. Send check or M. O. to: Joan Moshimer, Dept. WB, Kennebunkport, Me. 04046.
