CRYSTAL

SPECTACLES.

THE BEST FOR PRESERVING THE SIGHT.

T. H. & SON having effected many valuable improvements in the manufacture of Spectacles, guarantee without fear of disappointment, to suit every kind of sight, if informed these particulars, viz., the age of the person; whether spectacles have ever been used, and if so, for what period; the distance newspaper print can be best seen without glasses; the purposes for which spectacles are especially required, whether for sewing, reading, or for seeing at a long distance. By the judicious application of them, the many painful sensations in the eyes so frequently complained of by ladies when at needle work, music, &c., are removed. They are very beneficial by candle-light, and enable the wearer to continue reading or sewing for a much longer time without atigue, or the risk of injuring the sight.

T. H. & SON have particular regard in adapting the shape most suitable to fit each person's face. Badly-formed spectacles subject the wearer to many annoyances, such as continually shifting their position from the eyes, the frame intersecting the sight, causing too much pressure on the temples, disarrangement of the hair, marks on the nose, &c. All these inconveniences may be avoided by using T. H. and Son's improved Spectacles, which, from their light (nearly invisible) appearance, do not at all disfigure the countenance; and being composed of pure Crystal, are the most efficient for preserving the sight.
