Textile-Painting

Designs for Textile-Painting

No. C331 Textile Paint-Set, consisting of four colors with blender, brush, and complete instructions, $2.00.

Before tincting with textile paints, tack material securely on a flat surface over a piece of white blotting-paper, which will serve to take up any excess paint. When tincting is done, and thoroughly dry, press the painted portions with a hot iron at least twice between damp—not wet—cloths, to set the color. Once more lack the fabric over blotting-paper for more work. This method consists of covering the outlines of a design with a tube-paste which is applied with a waxed-paper cone and which while still moist is sprinkled thickly with gold or silver metal powder. The paste, in drying, remains flexible, and edges need no other finish, because the threads of fabric are firmly held when the article is cut out.

With these transfer-patterns and materials you may decorate prettily, without any difficulty. Easy and pleasing when done. No special skill, or course of training, necessary. You can pick up this art yourself, if not already applying it to beautify your dainty things.
