Knit to Fit

WITH

Dawn® WOOLS AND NYLONS

BASIC MEASUREMENTS

We have tried to make the size measurements in this book as accurate as possible. Therefore, if you are knitting a size 12 sweater, the chest measurements for the average person should be 34 inches, as shown on the chart below. The number of stitches indicated in the directions for the sweater you are making in size 12 should work out to 34 inches if you follow your gauge correctly.

Measurements and directions shown in this book are blocking measurements as well as actual size measurements. Knit to fit! A chart below is for your guide.

GAUGE INSTRUCTIONS

The stitch gauge which appears at the beginning of all instructions for knitting and crocheting is very important to the size and fit of your garment. Before starting your work make a sample swatch of the pattern stitch with the needles or hook and yarn specified. If you get more stitches to the inch than gauge calls for, you are working tightly, therefore change to larger size needles or hook. If you get fewer stitches to the inch you are working loosely, therefore change to smaller size needles or hook. It is very important to check your gauge as you progress, to assure yourself of a perfectly sized garment.

In each set of instructions in this book, wherever an abbreviation is used, it is first written in full so there can be no misunderstanding that Ch stands for CHAIN and Sc for SINGLE CROCHET and Dc for DOUBLE CROCHET, and so forth. Every set of instructions actually spells out each abbreviation and from then on it is very simple to follow through. We hope you like our new way of writing directions and that they will prove more interesting than ever.

*(Asterisk)—This sign indicates that the instructions immediately following are to be repeated the given number of times plus the original.
