ABBREVIATIONS IN TATTING

r st—Stands for reverse stitch.
s sl st—Stands for slip stitch.
d s—Stands for double stitch.
r—Stands for ring.
p—Stands for picot.
ch—Stands for chain.

cl—Stands for close.
sep—Stands for separated.
rep—Stands for repeat.
p ch—Stands for picot chain.
l r—Stands for large ring.
s r—Stands for small ring.

NOTE

All beginners should use coarse thread to see work better.

A ring is always to be drawn close unless otherwise stated.

Never break off thread after winding shuttle if directions call for chain (ch).

HOW TO MAKE TATTING

With end of shuttle thread between thumb and first finger of left hand, pass thread around fingers of this hand not too tightly. Cross thread over first finger. Holding point of shuttle between first finger and thumb of right hand, with shuttle horizontal, and thread from you, raise thread with middle finger of right hand by passing finger first over and then under. Pass shuttle under thread on left hand, between first and second fingers, without releasing shuttle; bring back over this thread and under thread on right hand, draw shuttle thread forward tightly, gradually drawing up stitch with fingers of left hand. Do not release stitch. Draw loop up to thumb and catch with thumb. Notice that the left hand thread is looped around the shuttle thread. This is called a half stitch (the first half).

NEW METHOD IN TATTING

For the second half, thread is dropped instead of raised, shuttle is passed over left hand thread instead of under (as before), is brought through below, between the two threads (as before) and drawn up the same.

These are the only motions in tatting, and in no case should the shuttle be released in making a ring which is composed of any number of stitches.

A picot which is made by leaving a space of thread between stitches may be joined by drawing working thread through picot and passing shuttle through loop, then drawing up close to resemble a half stitch but not to be counted as such.

A chain is made by working with an extra thread for the left hand or by winding a long thread off the shuttle to work with.

DIRECTIONS FOR THE REVERSE STITCH

Begin ring, making three double stitches, picot, two double stitches, picot, three double stitches (figure one) (this is one half of ring), take work off from hand* (reverse), turn over (figure two), put work on hand so that the thread which was under is now over the hand. Take shuttle No. 2 and make the other half of the ring, with the reverse stitch, which is done by holding the thread on the hand taut, and making the stitch with the thread from the shuttle, making three double stitches, picot, two double stitches, picot, three double stitches (figure three), take work from hand, turn over*, take shuttle No. 1 and close ring (figure four).

In joining while doing reverse work do not draw shuttle very taut after passing through joining loop, but draw the loop back again so that the joining stitch is made with the thread from shuttle and the thread on the hand may be drawn back and forth.
